PREFACE

ANDREW H. CARD, JR.
President and
Chief Executive Officer
American Automobile
Manufacturers Association

Established as one of the leading sources of international information on passenger cars and commercial vehicles, *World Motor Vehicle Data* is in its 30th edition. Its contents on motor vehicle production, exports, imports, registrations and sales have been collected from various sources worldwide by our Statistics and Information Services group.

The data in this report were supplied by government agencies, trade associations and private services. Since it is often necessary to use different data sources from year to year, there are occasional differences in the figures reported. There is also a lack of uniformity of worldwide definitions for vehicles and, in some cases, car, truck and bus data vary from one source to another.

Although special efforts have been made to segregate vehicle assembly from production data, the world production total may include some "double counting" since it is not possible for all countries to distinguish assembly from production.

In addition, it should be noted that the basis on which the data are reported will vary. For example, vehicle output may be measured in terms of production, shipments, or factory sales. New vehicles sold may be measured in terms of retail sales or new registrations.

If upon reviewing *World Motor Vehicle Data* you have comments, suggestions or questions about its contents, please feel free to contact us. We strive to publish the best information available.

NOTE: The above table contains Motor Vehicle exports as counted by the Motor Manufacturers. Differences between the figures of Export Allocation of Production and the export figures collated by Customs and Excise arise from Customs classifying some countable KD sets as "Parts and Accessories", rather than as vehicles, because of difficulties in identifying certain shipments. Also includes categories of unassembled vehicles not counted by the manufacturers.

(1) Prior to 1986 mini-buses were included in buses. From 1986 they are included in medium and heavy vans.

(1) Includes electric cars and automobiles with other fuel types.
(2) 1970–1992 data is for Great Britain.

NOTE: From October 1982 all general goods vehicles less than 1525 Kgs. unladen weight are assessed for vehicle excise duty at the same rate as private vehicles. The previous private car & van taxation class has been replaced. The above table shows for the first time registrations by actual body type.
